# Younes Chouikh

## ABOUT

**Aspiring Software Engineer | .NET Enthusiast**

I am a passionate first-year Software Engineering student who loves solving real-world problems through code. Skilled in C# and currently learning the .NET ecosystem. Former Technical Lead at Google Developers Student Club ISSATSo, with a proven ability to collaborate and share knowledge. Quick learner, always eager to embrace new technologies and challenges.

Bachelor's Degree in Computer Science    2021-2024
**Relevant Coursework:** Intro to CS and Algorithms; Operating Systems; Algorithms; Data Structures; Databases; Database Administration; Intro to Networks;

**Higher Institute of Applied Sciences and Technology of Sousse**    **Tunisia, Sousse**
Engineering Degree in Computer Science & Software Engineering    2024-2027
**Relevant Coursework:** Software Engineering; Operating Systems; Advanced Algorithms; Data Structures; Databases; Database Administration; Networks

## PROFESSIONAL EXPERIENCE

**Proxym**    **Tunisia, Sousse**
Software Developer Intern    Feb 2024 – Jun 2024
- Design and Develop a Crowdfunding platform for startups, which creates a new channel for startups to pitch their ideas and look for investments, and investors can invest on the platform.

## PERSONAL PROJECTS

**ISSATSo Schedule Scrapper (**[Github Repo](Github Repo)**,** [Demo](Demo)**)**    **Feb 2024**
- A full-stack web application that fetches schedules and checks for available classrooms on a given day and session.

**Image Gallery (**[Github Repo](Github Repo)**,** [Demo](Demo)**)**    **Jan 2024**
- Image Gallery is an image discovery web app that helps you find new and interesting images to download or share. With Image Gallery, you can search for images by term and type and order them by most popular or latest.

**Todo Mobile Application (**[Github Repo](Github Repo)**,** [Demo](Demo)**)**    **Nov 2023**
- This Android application provides a user-friendly platform for managing tasks while incorporating authentication and local storage mechanisms for enhanced security and data persistence.
- The app has a French and an English version.

**GDSC Discord Bot (**[Github Repo](Github Repo)**,** [Demo](Demo)**)**    **Jan 2022**
- A private general-purpose Discord bot made to organize the Discord server of a volunteer activities club.

**Yoink Yoink (**[Itch.io](Itch.io)**)**    **Mar 2021**
- A Unity game I developed called "yoink yoink" can be played in a browser or downloaded; it supports local multiplayer.

## ACTIVITIES AND LEADERSHIP

**Google Developer Student Clubs - ISSATSo**    **Sousse**, TN
*Technical Lead ([GDSC Platform](GDSC Platform))*    Aug 2022 – Jul 2023

- Planned and executed Git Basics 101 Course (Still in production)
- Develop a Discord bot to manage our server
- Hosted workshops on how to develop your own Discord bot.

## SKILLS AND OTHERS

- **Technical**: Python (Discord API, Pandas, Django, etc...), C#, .NET, Azure, Entity Framework, React JS, React Native, Docker, Git, SQL, ...
- **Online Courses and Certificates:** Google IT Automation with Python by Google on Coursera, Microsoft Certified: Azure Fundamentals, Qwiklabs GCP tracks, CCNA: Introduction to Networks, Foundational C# with Microsoft, Docker for the Absolute Beginner - Hands On
- **Hobbies:** Swimming
