Summary

M.Sc. Software Engineering candidate (graduating July 2027) with hands-on experience building practical software products for real users across internships, freelance work, and student communities. Strong at turning ambiguous ideas into reliable tools, from AI-assisted workflows to web platforms. Demonstrates ownership, rapid learning, and effective collaboration with both technical and non-technical stakeholders.

Technical Skills

Languages: C#, Python, TypeScript, JavaScript, Java
Frontend: React, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, ShadcnUI
Backend: ASP.NET, Django, Flask, FastAPI, Spring Boot, Node.js, Express.js, REST APIs, Microservices
AI & LLM Ops: RAG, Agentic Workflows, Tool Calling, Prompt Engineering, MCP, Vector Databases
Cloud & DevOps: Azure, AWS, GCP, Docker, Kubernetes, Terraform, GitHub Actions, Linux, Kafka
Databases & ORMs: MS SQL, PostgreSQL (pgVector), MySQL, OracleDB, Qdrant, MongoDB, Redis, Entity Framework Core, Django ORM, Drizzle, JPA, Hibernate
Testing & Tools: .NET xUnit, Vitest, Jest, Cypress, React Storybook, Puppeteer, Git, Postman

Education

Higher Institute of Applied Science and Technology (ISSAT Sousse) Sousse, Tunisia
Master's Degree in Software Engineering *Sep 2024 – Jul 2027 (Expected)*
– Coursework: Distributed Systems, Artificial Intelligence, System Design, Design Patterns, Web Development.

Higher Institute of Applied Science and Technology (ISSAT Sousse) Sousse, Tunisia
Bachelor's Degree in Software Engineering *Sep 2021 – Jul 2024 (Expected)*
– Coursework: Algorithms, Artificial Intelligence, Operating Systems, SDLC

Professional Experience

Insimplo Berlin, Germany (Remote)
AI/.NET Software Engineer Intern *Jul 2025 – Aug 2025*
– Designed and implemented an AI-assisted damage assessment workflow that analyzed property images (water, mold, structural wall damage) and generated structured repair quotes with positioned line items, quantity takeoffs, and cost estimates.
– Developed the end-to-end prototype across computer vision and desktop interfaces using Python, C#, .NET WPF, YOLO, and PyTorch, enabling faster and more consistent quote preparation.

Proxym Sousse, Tunisia
Software Engineer Intern *Feb 2024 – Jun 2024*
– Developed and launched a cross-platform crowdfunding platform for startups, enabling secure investor transactions and improving startup visibility.
– Built a DialogFlow chatbot with Redis-backed state management to automate FAQs and investment guidance, improving user support efficiency.
– Led full-stack delivery with React, React Native, NestJS, PostgreSQL, and Docker to strengthen scalability, performance, and deployment reliability.

Personal Projects

SketchAI – *Real-Time Multiplayer AI Game* | React, ASP.NET Core, SignalR, Redis 2025
– Built a real-time multiplayer game supporting 10+ players in a single room, featuring AI-assisted sketching, intelligent word explanations, and image hints to improve gameplay engagement.

Choufli Hal Platform – *Hackathon Portal* | Next.js 15, MongoDB, NextAuth.js 2024
– Co-developed an event management platform for Google Developer Group handling 200+ registrations, automated team formation, waitlisting, and transactional email dispatch.

ISSATSo Schedule Scrapper – *Scheduling Automation Tool* | React, Django, BeautifulSoup, PostgreSQL 2024
– Created a full-stack application that automated schedule retrieval and classroom availability checks, adopted by 5+ university clubs to streamline event and meeting planning.

GDSC Discord Bot – *Community Automation & Moderation* | Python, Discord.py 2023
– Engineered a Discord bot to automate moderation, event workflows, and community management for student developer communities.

Leadership & Community

Google Developer Group On Campus ISSATSo

Technical Lead & Mentor *Sep 2023 – Jun 2025*

- Directed a 10-member development team and delivered 3+ production projects, leading project management, issue planning, and hands-on development.
- Hosted technical workshops on Python, React Native, Git/GitHub, and Docker, helping community members strengthen hands-on development skills.
- Developed and maintained Discord automation bots for moderation, event coordination, and community operations.
- Contributed to recording and editing the student-led "Tawla & Kressi" technology podcast to improve outreach and career awareness for university students.
